**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Mazanec et al, '713.

Mazanec et al, '713 show a solid membrane comprising a mixed metal oxide material of perovskite structure containing lanthanum (a lanthanide) in combination with cobalt, strontium or an oxide thereof. See (col. 3, lines 65-68; and col. 4, lines 5-60). The membrane described contains "less than 13 mol % of bismuth" (approximately 0.19 mol %, E.g., see example 3).

As for claim 31, the claimed conductivity properties would be inherent to the mixed oxide perovskite (oxygen ion deficient) structure in the reference.

***Election/Restrictions***

3. Claims 32-44 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seivers shows an oxide composition, which has a perovskite structure.
